

RAMADHANI SAFITRI

Software Engineer | Backend Development

ramadhanisgy@gmail.com 0822-8474-5760 linkedin.com/in/rmdsftr

Pekanbaru, Riau (open to relocation)

PROFESSIONAL SUMMARY

Information Systems graduate from Andalas University (GPA 3.78/4.00) with a strong focus on backend development. Experienced in building applications using Go, Node.js, Flutter, and React.

WORK EXPERIENCE

PT Denso Indonesia, Information Systems Intern **Jul 2024 - Aug 2024**
Built an internal PC registration system with automated hardware specification scanning.

BAPPEDA Sumatera Barat, IT Intern **Jan 2025 - Feb 2025**
Built a web-based internship attendance system with location-restricted QR verification.

TECHNICAL SKILLS

Languages
Go, TypeScript, Dart, SQL, JavaScript, Python

Backend
Go (Gin), Node.js (NestJS, Express.js), REST API Development

Databases
PostgreSQL, MySQL, Microsoft SQL Server

Tools
Git, Docker, VPS (Linux), Postman, Cloudflare, Figma

Frontend & Mobile
Flutter, React (Vite)

RECENT PROJECT

Digital Waste Bank Information System

(Go (Gin), Flutter, React (Vite), PostgreSQL, Cloudflare R2, Firebase Cloud Messaging, Docker, VPS)

- Built a waste bank management system consisting of a Flutter mobile app, a React web application, and a Go backend, supporting two-tier (BSM–Customer) and three-tier (BSI–BSU–Customer) operational models, piloted across 6 waste banks in Padang and funded by Andalas University.
- Designed and implemented RESTful APIs in Go (Gin) backed by PostgreSQL, using Cloudflare R2 for file storage and Firebase Cloud Messaging for push notifications.
- Integrated core business processes (waste deposits, sales, profit-sharing, and withdrawals) into one consistent, traceable data flow.
- Implemented automated profit-sharing calculations, balance mutations, QR code–based transaction verification, scheduling management, and waste savings monitoring.
- Ensured balance consistency in profit-sharing and balance mutations using database transactions with row-level locking, preventing race conditions from concurrent requests.
- Delivered push notifications to many users concurrently with goroutines, running delivery outside the request path so API response times were unaffected.
- Built a background worker using goroutines and time.Ticker to automate scheduling management.
- Secured the API with rate limiting and single-session enforcement.
- Wrote unit tests with Testify for core business logic; containerized and deployed the backend and web application using Docker on a Linux VPS.

OTHER PROJECTS

PC Registration System – PT Denso Indonesia
(Express.js, SQL Server, MySQL, Python)

- Developed an internal web and desktop application for automated corporate PC registration during an internship at PT Denso Indonesia.
- Built automated hardware specification scanning using Python.
- Developed a digital registration form integrated with the company's internal database.
- Generated registration documents in PDF format.

Internship Attendance Information System – BAPPEDA Sumatera Barat
(Express.js, MySQL)

- Developed a web-based attendance management system during an internship at BAPPEDA Sumatera Barat.
- Implemented real-time attendance recording using location-restricted QR code verification.
- Built attendance reporting with Excel export functionality.
- Simplified attendance management for internship participants.

Thesis Monitoring Information System
(NestJS, TypeScript, Flutter, PostgreSQL, Supabase)

- Developed a mobile-based thesis monitoring application for the Department of Information Systems, Andalas University.
- Built RESTful APIs using NestJS and integrated cloud storage with Supabase.
- Implemented thesis progress tracking, supervision scheduling, meeting history, and supervisor/title change request workflows.
- Developed as part of the Information Systems Development Project course.

EDUCATION

Andalas University, Department of Information Systems 2022-2026
Thesis: *Development of a Mobile and Web-Based Waste Bank Information System Using a Two-Level Hierarchical Model at the Integrated Waste Processing Center of Universitas Andalas* GPA 3.78

LEADERSHIP EXPERIENCE

Research & Development Coordinator 2026
Laboratory of IT Governance and Infrastructure

Research & Development Coordinator 2025
Fundamental Computing Laboratory

Secretary General 2024-2025
Information Systems Student Association

Treasurer General 2023-2024
Information Systems Student Association
